

# Permeable Pavers (Mechanical Installation)

As the leader in sustainability and green building paving solutions, Fred Adams Paving offers these fine products from the foremost manufacturers in the industry.

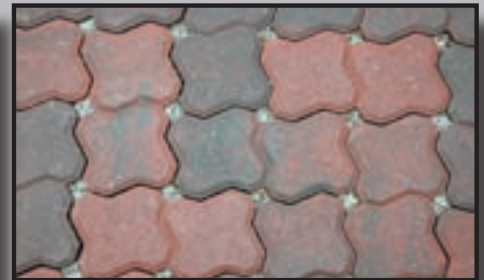

These Permeable Interlocking Concrete Pavers (PICP) can be mechanically installed using specialized paver installation equipment which decreases your construction time. They can be installed in a variety of designs including running bond and herringbone patterns. Whether you are at your impervious coverage maximum limit or you are looking to obtain LEED credits, these pavers will meet your project needs.
